MANIKANTA ENGALLIGI

M.Sc. Computer Science Student

(+49) 0176 3227 3858 · manikantahandral@gmail.com · Leipzig, Germany · LinkedIn · GitHub · Portfolio

SUMMARY

I am a Master's student in Computer Science (Big Data & AI) at SRH University Leipzig, with a Bachelor's in Computer Science Engineering. Through my internships, I have worked with React.js, .NET, SQL, and Python on full-stack development, APIs, and software delivery. I am ready to contribute to a team, learn quickly, and support software and data-related work in a professional environment. I am looking for working student and internship roles in AI engineering, software development, data, and business analytics.

PROFESSIONAL EXPERIENCE

DevOps Intern | Moka Softwares Private Limited **Nov 2025 – Feb 2026 - Ballari, India**

- Supported CI/CD pipelines, environment setup, and deployment of internal applications across development and production
- Built reusable React UI modules and implemented token-based authentication with protected routes
- Debugged API and deployment issues, and monitored logs to keep releases stable in an Agile team

Engineering Intern | Biosoft Health Tech Pvt. Ltd. **Oct 2024 – Jan 2025 - Bengaluru, India**

- Developed frontend components in React.js and backend REST APIs in .NET Core with SQL Server
- Supported frontend–backend integration, including authentication flows, and tested modules before handover
- Documented technical work and collaborated with senior developers across the development cycle

EDUCATION

M.Sc. Computer Science – Big Data & Artificial Intelligence **Apr 2026 – Present**
SRH University, Leipzig, Germany

Relevant Coursework: Big Data, Artificial Intelligence, Machine Learning, and Cloud Computing

B.E. Computer Science Engineering **Dec 2021 – Jun 2025**
Global Academy of Technology, Bengaluru, India

Relevant Coursework: Software Engineering, Databases, Data Structures, Algorithms, and Web Technologies

PROJECTS

ICE Train Delay Prediction — Machine Learning Forecasting Model **May 2026 – Aug 2026**

- Built a model predicting ICE train delays in minutes from Deutsche Bahn operational and historical weather data, supporting scheduling and passenger information

- Prepared and merged large datasets, engineered features, and benchmarked linear, Random Forest and gradient-boosting models on separate test months
- Delivered a validated final model with documented accuracy and feature impact, providing a clear basis for judging operational value; two-person team

ForestGuard — Satellite-Based Deforestation Detection **May 2026 – July 2026**

- Led a five-member Agile team delivering a web platform that detects forest loss from satellite imagery, replacing manual review for researchers and conservation groups
- As Scrum Master, managed the Trello backlog with MoSCoW prioritisation, facilitated sprint planning, stand-ups and retrospectives, and set up the repository, run scripts and documentation
- Delivered the working MVP across three sprints, using burndown charts and effort estimation to control scope, workload and deadlines

Data Analysis Toolkit — Automated Data Analysis and Visualisation Platform **Apr 2026 – Jun 2026**

- Developed a modular Python toolkit and dashboard automating data cleaning, statistical analysis and visualisation for structured datasets
- Designed reusable components so the same pipeline applies to new datasets without rewriting code, improving consistency across analyses
- Reduced manual preparation effort and presented results clearly for non-technical stakeholders, shortening the path from raw data to decision

Vital Guard — IoT-Based Fall Detection and Alert System **Dec 2024 – May 2025**

- Developed an IoT wearable that detects falls through motion sensor analysis and alerts caregivers automatically, addressing a real risk in elderly care
- Implemented the detection logic and alert workflow, transmitting live location data to caregivers to shorten emergency response time
- Validated the system across varied movement scenarios to reduce false alarms and improve reliability; completed as a three-member bachelor project

TECHNICAL SKILLS

- **Programming:** Python, Java, C#, JavaScript, TypeScript, SQL
- **Web & Backend:** React.js, Next.js, .NET Core Web API, FastAPI, REST APIs, HTML, CSS
- **Data & Machine Learning:** Pandas, NumPy, Scikit-learn, XGBoost, TensorFlow, OpenCV, NLP
- **Databases:** SQL Server, MySQL, PostgreSQL
- **Cloud & DevOps:** AWS, Git, GitHub, Docker, Linux, CI/CD, Postman, Swagger
- **Ways of Working:** Agile, Scrum, Sprint Planning, Backlog Prioritisation (MoSCoW), Trello
- **Office Tools:** Microsoft 365 – Excel, Word, PowerPoint, Outlook, Teams

LANGUAGES

- English – C1 (Professional)
- German – B1 (Intermediate)

I hereby confirm that the information provided above is accurate and reflects my qualifications, experience, and achievements to the best of my knowledge.
